

The logo for Transaction Pro Access. It features the word "TPro" in a stylized font where the "T" is blue and "Pro" is green. Below "TPro" is the text "Transaction Pro" in a smaller, blue, sans-serif font. To the right of "TPro" is the word "Access" in a large, bold, black, serif font. The background of the top of the page shows a close-up of a credit card payment terminal.

TPro Access

Transaction Pro

The theft of consumer data is a major issue today for merchants and customers costing individuals \$5 billion and businesses over 48 billion in losses. With security breaches on the rise - the rule of thumb regarding storing sensitive customer credit card data is: **Don't store it!**

THAT IS UNTIL NOW!

Transaction Pro Access easily, seamlessly, and safely stores your sensitive data in our secure data storage center giving you complete management, reporting, and user protected access 24 hours a day, 7 days a week from anywhere in the world!

- Instantly Achieve Compliance
- Increase Trust – Reduce Risk
- Protect your company from large fines or penalties

In addition, Access generates in-depth customizable reports. This data can be remotely retrieved to provide real-time transaction accountability and access based behaviors by employees. Also, retained data can safely be used to mine data for marketing promotions, recurring billing, as well customer continuity

What is TPro Access?

TPro Access is a PCI-DSS compliant, internet-accessed data storage service. Access can be used alone or in conjunction with POS or accounting systems that are already in use so a merchant is not required to disrupt or transfer their gateway or processing services.

- With Access's flexible platform, you can select the look and feel of your front page which can either simulate your branded site or something entirely new.
- Comprehensive reporting can provide real insight into your company and employees interaction as well as an export utility that allows you to export data using several popular formats.

Simply Put Sensitive Information Self Storage Off site

With Access, merchants can quickly enter sensitive cardholder information into a customizable screen. The data is then transmitted real-time to TPro's compliant gateway where the data is received, encrypted, and stored according to Visa MasterCard standards.

Additionally, the information is retrievable by authorized employees with password-protected access. Access removes the risk of storing sensitive card information on the merchant's internal systems which ensures compliance and limits liability. . . completely eliminating the burden of worrying about security.
