

Protect

Advanced Fraud Protection

Fraud is one the most demanding of challenges an online merchant can face. Online fraud costs businesses billions of dollars in losses each year and that figure is on the rise. With Transaction Pro's advanced fraud protection suite, you can protect your valuable profits, minimize chargeback fees, and set-up a customized first line of defense against fraudulent transactions.

- **Reduce Costs & Maintain Profits**
- **Reduce loss of product**
- **Customizable to your needs**
- **Ease of integration**
- **Detailed reporting capabilities**
- **Email notification for suspicious transactions**

Defend Against Fraud

TPro Protect will help turn the tide against fraud losses for all payment transactions by allowing merchants the opportunity to prevent fraud before it happens. Because each fraud protection tool has its own strengths, Protect combines the industry's top fraud-protection tools to provide an exceedingly comprehensive fraud protection service.

Fraud Detection Filters

TPro's robust detection and fraud defense filters enable you to tailor customizable tools to meet exactly what your unique needs may be. You can restrict transactions from a specific IP address or email service providers both international and domestic as well as monitor for mismatched addresses, or shipping/billing mismatches. TPro also has a built in amount and velocity filter which allows you set the number and amount of transactions received reducing the high volume attacks and the testing of card numbers common in fraud.
